I'm assuming this is the 2006 PM 2.5 standard that is being exceeded?

Thanks, Dena. I hadn't even thought of adding the PM2.5 exceedances, but I'll do that now. Are all of the PM2.5 days the same as the PM10 days?

Matt - I confirmed the most recent data in AQS for the CDF monitor from 2012-2014 - 7 exceedances of the federal 24-hour PM10 std and 7 exceedances of the federal 24-hour PM2.5 std. 2014 data will be certified by May 1, 2015. Here's the breakdown by year:

Year	PM ₁₀	PM _{2.5}	Notes
	Fed 24-hr exceedances	Fed 24-hour exceedances	
2014	2	2	Unofficial; includes preliminary data
2013	2	2	
2012	3	3	

Please let me know if you'd like any additional info,

Dena
